GNU/Linux Command-Line Tools Summary

I could not get Foxit Reader (v7.0.6) to print silently in the background. It opens a minimized version of the GUI and does not return control until it is manually closed :(So I ended up using SumatraPDF, which has the command line switches -print-to-default (or -print-to myprinter) and -silent that allows for completely silent background printing! ! And the return code is 0 if it succeeds ...
