Isolation and characterization of lignins from wheat straw: Application as binder in lithium batteries

Isolation and characterization of lignins from wheat straw

Affinity chromatography is a method of separating biochemical mixture based on a highly specific interaction between antigen and antibody, enzyme and substrate, receptor and ligand, or protein and nucleic acid. It is a type of chromatographic laboratory technique used for purifying biological molecules within a mixture by exploiting molecular properties. ...

Fly ash quality measures have been established based on major element chemistry and mineralogy. The cementing efficiency of fly ash in concrete has been shown to be related to the physical and chemical properties of the fly ash.

Fly Ash Classification Old and New Ideas

Lithium (from Greek: λίθος, translit. lithos, lit. 'stone') is a chemical element with symbol Li and atomic number 3. It is a soft, silvery-white alkali metal. Under standard conditions, it is the lightest metal and the lightest solid element. Like all alkali metals, lithium is highly reactive and flammable, and is stored in mineral oil. When cut, it exhibits a metallic luster, but moist air ...

Preliminary Program as at 22 May 2018 Sunday 1 July 2018

1. Introduction. Nanocomposites are composites in which at least one of the phases shows dimensions in the nanometre range (1 nm = 10⁻⁹ m). Nanocomposite materials have emerged as suitable alternatives to overcome limitations of microcomposites and monolithics, while posing preparation challenges related to the control of elemental composition and stoichiometry in the nanocluster phase.

Nanocomposites: synthesis, structure, properties and new

60 participants from 15 countries made the last EMEA-workshop in June 2017 a success. The coming EMEA2018 Workshop will be the 6th workshop in this series. Material developments and ion exchange membrane based systems for energy applications will be discussed by representatives from research and industry with the focus set on anion exchange membranes.

EMEA-Workshop

- It is distributed four times a year. The first volume was published in september of 2010. - publishes high-level Communications, Research Articles and Mini-Reviews related to all field of electrochemical science and technology.

2. General aspects of chitosan-structural and functional features2.1. Structure, source and physicochemical properties of chitosan. Chitosan molecule is a copolymer composed of N-acetyl-d-glucosamine and d-glucosamine units available in different grades depending upon the degree of acetylated moieties ().It is a polycationic polymer that has one amino group and two hydroxyl groups in the ...
