3 Measurable Functions Notation A pair (X;F) where F is a field of subsets of X is a measurable space. If is a measure on F then (X;F;) is a measure space. If (X) < 1 then (X;F;) is a probability space and is a probability measure. The measure can, and normally is, renormalised such that (X) = 1. Definition The extended Borel sets B, of R, is the set of unions of sets from

2 RIEMANN INTEGRATION 4. Riemann integral 4.1. Definition. f is Riemann integrable (RI) on $[a;b]$ if and only if there exists a real number $I \in \mathbb{R}$ with the following property: Given $\epsilon > 0$, there exists $\delta(\epsilon) > 0$ such that: $|\sum_{j=1}^n f(x_j^*) \Delta x_j - I| < \epsilon$, whenever $\sum_{j=1}^n \Delta x_j = b - a$ and $\Delta x_j < \delta(\epsilon)$. In other words, $I = \lim_{\|P\| \rightarrow 0} S(f;P)$. Notation: if f is RI, $I = \int_a^b f(x)dx = \int_a^b f dx = \int_a^b f$. Example 1. The function $f \dots$

Chapter 7 Continuous Functions In this chapter, we define continuous functions and study their properties. 7.1. Continuity Continuous functions are functions that take nearby values at nearby points. Definition 7.1. Let $f: A \rightarrow \mathbb{R}$, where $A \subseteq \mathbb{R}$, and suppose that $c \in A$. Then f is continuous at c if for every $\epsilon > 0$ there exists a $\delta > 0$ such that

Burrhus Frederic Skinner (March 20, 1904 – August 18, 1990), commonly known as B. F. Skinner, was an American psychologist, behaviorist, author, inventor, and social philosopher. He was the Edgar Pierce Professor of Psychology at Harvard University from 1958 until his retirement in 1974. Skinner considered free will an illusion and human action dependent on consequences of previous actions.
