Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or ...

Turn theory into practice by entering COMAP's Mathematical Contest in Modeling (MCM). The study of mathematics as a subject in its own right may have started with Pythagoras, but people have been counting as a basic necessity of everyday life for thousands of years.
